VULCAN

A New Level of Efficiency

Dependable and Versatile

- Cures all ink types with speed and consistency
- Unprecedented reliability
- Reduces gas consumption up to 25% compared to other major brands

Easy to Use

- Intuitive touchscreen operating system features micro-processor with digital control capability
- Save and recall most frequently used settings

Available in over 20 configurations:

- Models available from 36" belt width/6' heat chamber up to 72" belt width/20' heat chamber

Design and Construction

- Design provides a consistent and uniform temperature throughout the drying chamber
- Air-cooled cabinet located outside of heat module ensures a long life for all electrical components
- Improved design allows for easy maintenance and lower operating costs
- Convenient viewing window allows you to easily monitor the status of the burner visually.
- Heat-resistant stainless steel filter folds during removal for cleaning, saving space around the dryer.
- Removable access panels make it easy to clean and service the interior of the dryer.
- Heat resistant steel burner is durable to high temperatures.
- The burner is located on the side of the dryer which facilitates easy access.

Optional split belt

Air Handling

- 14" blower with variable speed controller for improved curing and reduced energy costs
- Optimized airflow with improved spacing of forward-curved blades - exchanges air inside of dryer 8 times every minute
- Double-wall stainless steel filter allows for maximum flow and less maintenance
- Fresh air feed fan

Conveyor System

- Digital belt speed readout
- Large rollers are crowned for better conveyor belt tracking
- Adjustable speed from a few feet up to 37.5 feet per minute
- Optional split belt on models with 48"+ belt widths

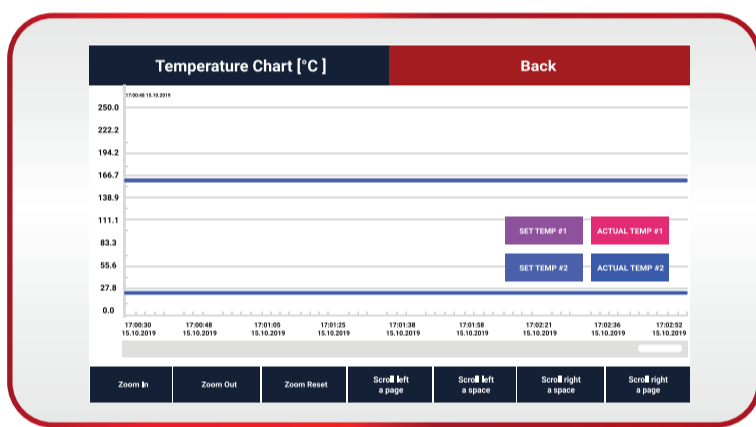

Energy Efficiency

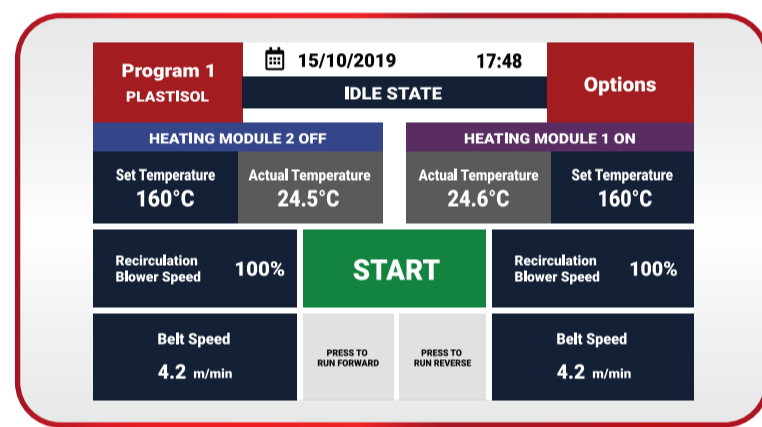

- Heavy-duty thermal insulation prevents heat from migrating into the workplace
- Exhaust dryer with flow adjustment from 300 to 1,000 SCFM, allows for a more energy efficient exhaust control
- Integrated hood prevents hot air from escaping

Heat Chamber

- Available for natural gas (NG) or liquid propane (LP)
- Double wall construction with galvanized steel interior

Tracks dryer temperature and substrate temperature in real time

Color touchscreen control display

Control Center

- Automatic shutdown sequence keeps the blower and belt running until the chamber cools
- Fuzzy-logic digital controller ensures consistency by keeping within 1 degree of target temperature
- A visible and audible warning is activated by an indicator light and buzzer when temperature is not within user-set parameters
- Touchscreen displays key operational information about heat chamber temperature, belt speed and other settings
- Programmable to retain 9 separate job settings
- Program a schedule for the dryer to start up and shut down automatically at specified times on given days of week
- View temperature plots to track temperature changes in real time

SPECIFICATIONS

Model #	Belt Width	Heat Chamber Length	Overall Length	Smoke Hood Length	Standard Infeed/Outfeed Length	Nominal Gas Input Pressure	Electrical Requirements	Exhaust Diameter	Maximum Burner Capacity
