Design and Construction

- Robust and solid construction.
 - Easy and simple replacement of the scoops
 - Adjustable angle of operator panel for more easy operation.
- Two coating range adjustment modes:
- Directly input start and end range distance in inches
 - Manually control jog speed, position and up/down bucket movements via HMI
- Independent and simultaneous work of front and rear buckets.
 - Servo controlled precise buckets movement.

Screen holders are adjustable to accommodate a wide variety of frame sizes and thicknesses

Foot pedal screen lock for easier screen replacement

STANDARD FEATURES

Compatible Screens

- Support wide screen frame height range between 15.5 - 43 inch.
- Support screen frame thickness in range between 0.8 – 2 inch.
- Electric servo controlled top arm position for easy and fast adjustment to needed screen size.
- Easy and reliable screen locks for simple replacement of the screen.
- Foot pedal screen lock for more easy screen replacement.

Uniform scoop coater pressure ensures a smooth, even coating of emulsion on the screen

Intuitive Control Interface

- New and more intuitive graphic user interface providing easier operation and access to most important settings
- Possibility to SAVE 20 programs with individual parameters including screen height and coating parameters.

User-friendly touchscreen control panel

Control panel angle adjustment for easier operation

DIMENSIONS	WEIGHT	AIR REQUIREMENTS	AIR PRESSURE	ELECTRICAL REQUIREMENTS
